Description:

Laid down in 1937 and launched on 9 April 1941, the USS North Carolina was the first new-construction battleship to enter service during WWII and took part in every major naval offensive in the Pacific Theater, becoming the most decorated US battleship of WWII. After a brief post-war stint as a training ship, North Carolina (dubbed in the press as the Showboat) was laid up in reserve before her eventual movement to Wilmington, and her preservation as a war memorial. This volume traces the history of North Carolina, photographically documenting the evolution of armament and electronics that elevated her pre-Pearl Harbor design to its peak, bristling with guns to counter the threat of kamikaze attack. Records the ship's wartime operations that earned her 12 battle stars, her crew, and their work and recreation.

Bought this book to learn about my fathers adventure in WWII as a sailor on USS N. C.. He was on it most of his time in service so it was home for him.I had no idea what he went through until reading about it after his passing because we lost him while I was still young so I missed his story.Anyone who had a loved one on this ship would be so proud of them after learning their tale. This book and another one called Boys Of Battleship North Carolina are both great reads and give great insight on the ship & its sailors history. What an amazing ride these young boys took even though it was pure hell at times and oh how soon they all became men. Great book!
